React.js, Vue.js, TypeScript, Next.js, JavaScript, HTML/CSS, Node.js, Go, Python, Ruby on Rails, GraphQL, REST APIs, PostgreSQL, Docker, Git, GitHub, CI/CD, Tailwind, Figma, Claude Code, Team Leadership, Mentoring, Code Reviews, Agile, Problem-solving, Accessibility, Technical Decision Making

Experience

Five Ages

Full Stack Engineer

Remote - Europe

Oct 2020 - Present

- Delivered personalized user experiences by developing a fully custom multistep funnel application using **REST APIs**, outputting tailored results for each client based on their specific metrics and requirements.
- Increased property listing conversions by building an end-to-end platform with **React**, **TypeScript**, and **Next.js**, featuring property search, booking flow, user management, and **Python**.
- Accelerated team velocity by leading the frontend team and mentoring 3 junior developers through code reviews and pair programming sessions, establishing **Agile** workflows and **Git/GitHub** best practices.
- Delivered a social media analytics and content creation tool by architecting the frontend with **React** and **Tailwind**, integrating with **AI APIs** and **PostgreSQL** backend services.

Blacklane

Full Stack Engineer

Berlin, Germany

Oct 2019 - Sep 2020

- Improved booking completion rates by building the user ride booking system from scratch using **React**, **TypeScript** and **Go**, handling thousands of daily reservations.
- Achieved 100% WCAG compliance by implementing **accessibility** standards across the platform, expanding the user base to include users with disabilities.
- Reduced onboarding time for new hires by mentoring junior developers and helping the team evaluate and select the **tech stack** for future development, including **CI/CD** pipelines and **Docker** containerization.

Dentolo

Full Stack Engineer

Berlin, Germany

Feb 2018 - Sep 2019

- Contributed to successful company acquisition by building the dynamic user onboarding service and invoice management system frontend using **VueJS**, **React**, **JavaScript** and **Ruby on Rails**, directly improving customer conversion metrics.
- Improved team output by leading the frontend team and mentoring junior developers, establishing **code review** standards and **technical decision-making** frameworks.

Isobar

Frontend Developer

Athens, Greece

Dec 2013 - Feb 2018

- Increased airline booking efficiency by building an end-to-end reservation system using **React** and **JavaScript**, processing thousands of daily flight bookings.
- Improved candidate screening efficiency by creating an interview screening tool that streamlined the hiring process across multiple departments.
- Delivered enterprise-grade solutions by developing a major mobile network company's website and internal employee management systems, supporting 200+ employees.
